Purpose of Contact: B Ponds - Backfill B-1 Concurrence

Discussion

The analytical results of the 51 confirmation samples collected in the B-1 excavation area show no exceedance above Action Levels (see attached sampling map). Therefore, KH proposes to backfill B-1 with clean on-site soils in accordance with the COE individual 404 permit. No soil from the B Pond dams will be used as backfill in the ponds.

We currently have a backfill design for rough grading (CH2M HILL) and will continue to use the B Ponds Erosion Control Plans. We are currently working on a wetland restoration design that would complete the backfill and wetland restoration of B-1.

EPA and CDPHE agreed with this approach.
